Safety, Quality and the Environment

Ironmonger Fabrications Pty Ltd considers the safety and health of personnel and the public the number one priority when planning any company activity. Hazards are identified and appropriate control measures are implemented in accordance with legislative requirements.

The company implements systems to conform to project specific Quality requirements. Strict adherence to Inspection and Test Plans is maintained including the compilation of quality records such as Weld procedures, Welder qualifications, NDT test results, material mill certificates and equipment calibration test results. The company has in the past implemented full fabrication traceability to AS 9001 and participated in quality audits to adhere to clients contractual requirements.

Protection of the environment is practiced in all company operations. Control and disposal of waste materials is carried out in accordance with legislative and council requirements. The company is able to demonstrate adherence to elements of ISO 14001 necessary to fulfill clients' project contractual obligations.
